RESPONSE TO FIRST OFFICE ACTION

Assistant Commissioner for Patents
Washington, D.C. 20231

RECEIVED
FEB 13 2003
TECHNOLOGY CENTER 2600
February 6, 2003

Sir:

In response to the office action dated November 6, 2002 received in the above-identified application, Applicant hereby respectfully requests reconsideration of the application based on the following amendments and remarks.

IN THE SPECIFICATION

[0019] Blanket cylinder 20 includes cylinder 11, which may be made of a rigid material such as a metal. Bladders 12 are disposed on a circumferential surface of cylinder 11. Bladders 12 may be ring-shaped so that each bladder encircles the circumference of cylinder 11. Bladders 12 are inflatable and may be filled with a fluid A, B, and C, which may be the same or different fluids. The fluid may include air, other gases, water, or other hydraulic fluids. Fluid lines 14 connect bladders 12 to fluid supply regulation units (not shown in Fig. 2). Each of fluid lines A, B, and C may go to the same fluid supply regulation unit or to different fluid supply regulation units so that the pressure inside of the bladders may be individually regulated. Cylinder covering 13 is disposed on the outer surface of bladders 12 to form the outside covering of blanket cylinder 20.
